

User Manual

Transaction Monitoring System

Version : 1.1

Date : 28-10-2024

Introduction

Welcome to the Transaction Monitoring System, designed for stock exchange environments. This system allows users to upload transaction data via Excel files and automatically detects anomalies within the transactions. By leveraging advanced analytics, the system helps ensure compliance with financial regulations, mitigate risk, and enhance the overall security of trading operations. This manual provides step-by-step instructions on how to upload files, interpret alerts, and manage flagged transactions efficiently, ensuring a streamlined monitoring process for users.

Step 01: Data Set Preparation

1.1 Obtaining the data file:

The required excel files can be retrieved from the following paths within ATrad BBO:

- 1- Other Reports >> Accounts >> Receipt Cash Book
- 2- Other Reports >> Accounts >> Payment Cash Book
- 3- Other reports>> Accounts>> Daily Purchases
- 4- Other reports>> Accounts>> Daily Sales

However, users are able to upload any transaction-related Excel file to the system, provided it meets the required format and structure for processing.

Step 01: Data Set Preparation

1.2 Excel file preparation:

Before processing, the Excel file must be prepared according to the following guidelines:

- ✚ Remove any headers containing broker details.
- ✚ Only files in .xlsx format are allowed for upload and processing.
- ✚ Delete any rows containing values such as "Total," "Subtotal," or similar, ensuring only the transaction data is retained.
- ✚ Remove any unnecessary **empty rows and columns**.
- ✚ The final file should be formatted to include **only one header row** and relevant transaction data, as illustrated below, to comply with the system's requirements

Step 03: Data File Upload

- ✚ A successful login will redirect users to the home page of the Transaction Monitoring System where users can upload the prepared excel file to the system.
- ✚ Upon selecting the **“Choose File”** option, users can browse and select the prepared Excel file.
- ✚ Then, clicking the **“Upload”** button will upload the data file to the system for processing.
- ✚ If there are any preparation errors in the Excel file, a relevant error message will be displayed, indicating the issues that need to be addressed.

Step 04: Column Selection

- After uploading the file, users will be redirected to the **column selection window**, where they can choose the relevant columns for anomaly detection.
- Checkboxes for columns that do not support the analysis are **disabled** to prevent selection.
- Users can also set an "**Anomaly Percentage (%)**" within a range of 0-100, which will be factored into the analysis process.
- Anomaly detected file will be downloaded upon clicking on the "**Detect Anomalies**" Button.

Powered by atradsolutions.com

Step 05: Obtaining the Anomaly Detected File

The system utilizes **Isolation Forest Algorithm** for anomaly detection, and the results are reflected in the downloaded Excel file. A new column labeled "Anomaly" will be added to the file, indicating the outcome of the analysis.

- ✚ If the value is **"Yes"**, it signifies that the corresponding transaction has been identified as an anomaly during the analysis.
- ✚ If the value is **"No"**, it signifies that the transaction has been identified as normal during the analysis.

This method helps to isolate and flag anomaly transactions for further review.

Change Password

- ✚ Users can change the password to the TMS by clicking on the **change password** option under the profile icon.
- ✚ Upon clicking users will be redirected to the password change window.

The screenshot displays the TMS administration interface. At the top, the header includes the 'ATrad Transaction Monitoring System' logo and navigation links: Home, History, Settings, Admin-Panel, and a user profile icon. A red box highlights the 'Change Password' button located under the profile icon. Below the header, the main content area is titled 'TMS administration' and 'Home > Password change'. The 'Password change' section contains a form with the following fields and instructions:

Please enter your old password, for security's sake, and then enter your new password twice so we can verify you typed it in correctly.

Old password:

New password:

Your password can't be too similar to your other personal information.
Your password must contain at least 8 characters.
Your password can't be a commonly used password.
Your password can't be entirely numeric.

New password confirmation:

At the bottom of the form is a button labeled 'CHANGE MY PASSWORD'.

FAQ

Why are some columns disabled during selection?

- Columns that are not relevant for analysis have been disabled to prevent their selection, as including them could result in inaccurate analysis.

What should be done if the file upload fails?

- If the file upload fails, ensure that the file format and structure adhere to the required specifications. Double-check that the headers are correctly formatted and no additional data is included.

How can users modify the anomaly detection parameters?

- Users can adjust the anomaly detection percentage on the column selection page by setting the desired "Anomaly Percentage (%)" value within the range of 0 to 100 before starting the analysis. Default it is set to 4%.
